

Severnside Wetlands: Building partnerships to restore the wetlands at Avonmouth/Severnside, the Gordano Valley and North Somerset Levels

Mendip Hills: Conserving limestone grassland and woodlands across the landscape. Catchment sensitive farming to protect clean water supply and nature rich local lakes.

Coast Path: Opening up access to the Somerset coast. Making it possible to walk between the South West and Wales Coast Paths.

Severn Estuary: Maintaining internationally important bird populations and feeding grounds while enabling recreation, flood protection, and renewable power.

Quantock Hills: Working with commoners and land owners to manage the heathland and woodland. Maintaining the special characteristics of the landscape for people to enjoy.

Blackdown Hills: Supporting rough grazing and small woodland management to conserve the best wildlife sites.

Polden Hills large blue project: Build a self-sustaining and expanding population of globally rare large blue butterfly.

Wiltshire, Avon and North Somerset Batlinks: Supporting bat friendly development and farming.

Avalon Marshes: Developing as one of England's premier wildlife destinations and expanding the habitat network for bitterns and other wetland wildlife.

Somerset Levels and Moors: Working with the Somerset Rivers Authority to increase flood resilience, enhance the nature rich wetland landscape and support sustainable farming.

River Avon: Working for a healthy, naturally functioning river that abounds with wildlife and supports sustainable farming and development.

Wiltshire woodlands: Encouraging woodland enterprises and management of ancient woodland sites

Wiltshire chalk landscape connection: Preserving historic features, maintaining and connecting fragmented chalk grassland and supporting bird friendly farming.

Dorset Heaths: Improve and further connect heathland habitats and progress Stour Valley green infrastructure project.

Poole Maritime: Complete the designation of marine protected areas and the England Coastal Path; and support the EA's lead on managed realignment.

Source to Sea: Work with EA on river water quality issues with planners and farmers, progress river restoration projects and improve the evidence for the condition of our protected estuaries.

Jurassic Coast: Complete the designation of a network of Marine Protected Areas. Establish the England Coastal Path. Build on the Olympic legacy in Weymouth and Portland.
