The Supporting Appendices

These appendices and the accompanying documents provide all of the information required to support the Shoreline Management Plan. This is to ensure that there is clarity in the decision-making process and that the rationale behind the policies being promoted is both transparent and auditable. The appendices are:

A: SMP2 Development	This reports the history of development of the SMP2, describing more fully the plan and policy decision-making process.
B: Stakeholder Engagement	All communications from the stakeholder process are provided here, together with information arising from the consultation process.
C: Baseline Process Understanding	Includes baseline process report, defence assessment, NAI and WPM assessments and summarises data used in assessments.
D: SEA Environmental Baseline Report (Theme Review)	This report identifies and evaluates the environmental features (human, natural, historical and landscape).
E: Issues & Objectives Evaluation	Provides information on the issues and objectives identified as part of the Plan development, including appraisal of their importance.
F: Policy Development and Appraisal	Presents the consideration of generic policy options for each frontage, identifying possible acceptable policies, and their combination into 'scenarios' for testing. Also presents the appraisal of impacts upon shoreline evolution and the appraisal of objective achievement.
G: Policy Scenario Testing	Presents the policy assessment and appraisal of objective achievement towards definition of the Preferred Plan (as presented in the Shoreline Management Plan document).
H: Economic Appraisal and Sensitivity Testing	Presents the economic analysis undertaken in support of the Preferred Plan.
I: Strategic Environmental Assessment (SEA) Report	Presents an overview of the environmental assessment process and shows how the requirements of the EU Council Directive 2001/42/EC (the Strategic Environmental Assessment Directive) are met.
J: Habitat Regulations Assessment	Presents an assessment of the effect the plan will have on European sites.
K: Water Framework Directive Assessment	Presents the Water Framework Directive assessment of the potential hydromorphological changes and consequent ecological impact of the preferred SMP2 policies.
L: Metadatabase and Bibliographic database	All supporting information used to develop the SMP2 is referenced for future examination and retrieval.

Within each appendix cross-referencing highlights the documents where related appraisals are presented. The broad relationships between the appendices are illustrated below.

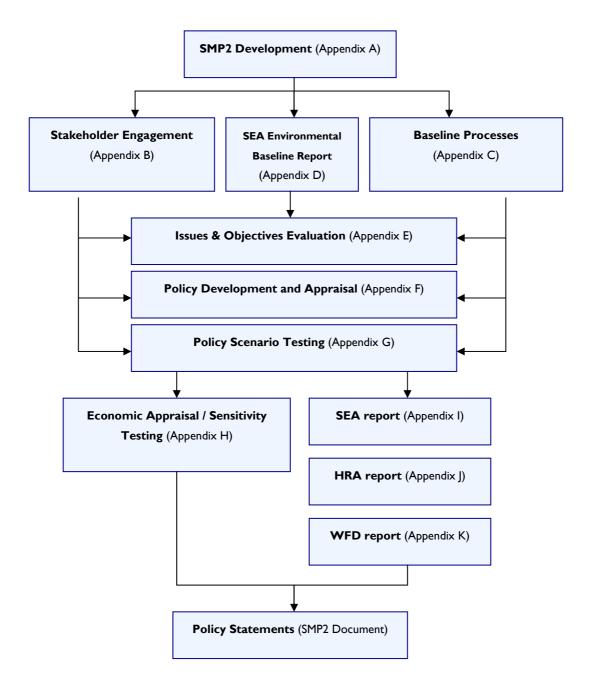

Table of Contents

L.I	BIBLIOGRAPHIC DATABASE	I
L.I.I	Main SMP2 Document	I
L.I.2	Appendix A – SMP2 Development	I
L.I.3	Appendix C - Baseline Process Understanding	I
L.I.4	Appendix D – SEA Environmental Baseline Report (Theme Review)	12
L.I.5	Appendix E – Issues and Objectives	15
L.I.6	Appendix G – Policy Appraisal	15
L.I.7	Appendix H – Economic Appraisal	
L.I.8	Appendix I – Strategic Environmental Assessment	
L.I.9	Appendix J – Habitat Regulations Assessment	
L.I.IC	Appendix K – Water Framework Directive assessment	20
L.2	MAPPED DATA	21
L.2.1	Main SMP2 Document – Policy Maps	
L.2.2	Appendix C – 'No Active Intervention' Flood and Erosion Risk Maps	
L.2.3	Appendix D – Theme Maps	
L.2.4	Appendix H – Economic Appraisal	23

L.I Bibliographic Database

This Appendix includes a list of the key reference materials used in the development of the Shoreline Management Plan.

L.I.I MAIN SMP2 DOCUMENT

References stated in the Main SMP2 Document are as follows:

Defra (2006) Shoreline Management Plan Guidance. March 2006

Halcrow (2002) Futurecoast. CD produced as part of the Futurecoast project for Defra.

Defra (2003) **Procedural Guidance for the Production of Shoreline Management Plans**; Interim Guidance May 2003.

Defra (2004) Supplementary Procedural Guidance, 2004.

NWRCZA (2009) North West Region Coastal Zone Assessment.

L.I.2 Appendix A – SMP2 Development

References stated in Appendix A are as follows:

- Defra (2006). Shoreline Management Plan Guidance. March 2006.
- Shoreline Management Partnership (1999a) Sub-Cell IIa: Great Orme's Head to Formby Point Shoreline Management Plan.
- Shoreline Management Partnership (1999b) Sub-Cell 11b: Formby Point to River Wyre Shoreline Management Plan.
- Shoreline Management Partnership (1999c) Sub-Cell IIc: River Wyre to Walney Island Shoreline Management Plan.
- Bullen Consultants Ltd (1998b) Sub-Cell IId: Walney Island to St Bees Head Shoreline Management Plan.
- Bullen Consultants Ltd (1998b) Sub-Cell I le: St Bees Head to the Scottish Border Shoreline Management Plan.
- Halcrow (2010) Cell Eleven Tidal and Sediment Study (CETaSS) stage 2(ii) Report.

L.I.3 Appendix C - Baseline Process Understanding

The Baseline Process Understanding has developed from a number of key references, i.e. the previous SMP, strategy studies and relevant extracts from Futurecoast. Other reports have also been reviewed, some of which were cited in the aforementioned studies.

L.2 Mapped Data

L.2.1 Main SMP2 Document – Policy Maps

(a) Basemapping (Communication, Topography and Coastline)

Simple map information based upon the Ordnance Survey, Meridian data (provided under licence, © Crown Copyright) to form the backdrop to the mapped information. Environment Agency Licence number: 100026380.2008.

(b) Present coastline

This was defined from a combination of Ordnance Survey mapping, aerial photography, and data input the National Coastal Erosion Risk Mapping project as part of that projects' local validation stage.

(c) Indicative Erosion Zones

These were defined as part of the assessment of shoreline response for the final policy and NAI (see **Appendix C** and the **main document** for details of this assessment) for years 2025, 2055 and 2105.

(d) EA Flood Zone Mapping

Environment Agency 2008 flood zone mapping was provided by the Environment Agency. This mapping provides a general overview of areas of land in natural floodplains and indicates where coastal flooding is possible. It should be noted that the EA is continually updating its maps and these should be used in preference to those presented in this SMP.

(e) National Nature Conservation Designation

For clarity of presentation, this combined datasets for: National Nature Reserves and SSSI sites (see below in Section L.2.3).

(f) International and National Nature Conservation Designation

For clarity of presentation, this combined datasets for: SPA, Ramsar, SAC, National Nature Reserves and SSSI sites (see below in Section L.2.3).

(g) Important Heritage Sites

For clarity of presentation, this included only Scheduled Ancient Monuments.

(h) Policy unit boundaries

These were defined as part of the SMP2 and mapped accordingly.

L.2.2 Appendix C – 'No Active Intervention' Flood and Erosion Risk Maps

(a) Basemapping (Communication, Topography and Coastline)

As above.

(b) Present coastline

As above.

(c) Indicative Erosion zones

These were defined as part of the assessment of shoreline response for the two scenarios: 'no active intervention' and 'with present management' (see Appendix C for details of this assessment) for years 2025, 2055 and 2105.

(d) EA Flood Zone Mapping

As above.

L.2.3 Appendix D – Theme Maps

(a) Data obtained from MAGIC website

A number of data sets were obtained from the government website MAGIC (Multi-Agency Geographic Information for the Countryside). These datasets were obtained in 2008. Copyright information is available on the website: www.magic.gov.uk:

- Areas of Outstanding Natural Beauty;
- Shellfishery harvesting areas;
- Heritage Coasts; and
- National Parks.

(b) Data obtained from Natural England and CCW

A number of data sets were obtained from Natural England (<u>www.naturalengland.org.uk</u>) and the Countryside Council for Wales (www.ccw.gov.uk). These datasets were obtained in 2008:

- Ramsar sites;
- Special Areas of Conservation (SAC);
- Special Protection Areas (SPA);
- Sites of Special Scientific Interest (SSSI);
- National Nature Reserves; and
- Local Nature Reserves.

(c) Data Obtained from English Heritage

Heritage Environment Records (HERs), formally known as Sites and Monuments Records, are a primary source of information on the local historic environment. Data from these were provided by County Archaeologists, and supplemented with national datasets from English Heritage. The following classes were mapped:

- Grade I listed;
- Grade 2* listed;
- Scheduled Ancient Monument;
- Conservation Areas
- World Heritage Sites;
- Protected Wreck Sites; and,
- Registered Parks and Gardens.

(d) Data obtained from the Environment Agency and Environment Agency Wales

A number of data sets were obtained from the Environment Agency. These datasets were obtained in 2008:

- Historic Landfill sites;
- Authorised landfill sites;
- EA indicative flood map; and,
- Critical infrastructure.

L.2.4 Appendix H – Economic Appraisal

(a) National Property Database

Environment Agency licensed data comprising of Ordnance Survey AddressPoint and Valuation Office data. This has not been reproduced on the final maps presented, but was used in the analysis of property loss.
